Summary

Results-driven B.Tech graduate in Computer Science & Engineering with a passion for full-stack development and leadership, eager to contribute innovative solutions.

Skills

- **Python, JavaScript Java,, Linux, Problem Solving**
- **Front-End** (HTML, CSS, JavaScript, ReactJs, NextJS, Bootstrap, MattrialUI, Tailwind CSS)
- **Back-End** (Django, NodeJS, ExpressJS)
- **DataBase** (MongoDB, MySQL, Sqlite, Firebase)
- AWS, Google Cloud , Azure, GitHub, MS-Office, Docker, Kubernetes

Professional Experience

Jan 2024 - Present

Neubitat Consulting Private Limited , Bangalore - Full Stack Developer Intern

- Spearheaded the development and implementation of real-time, scalable web applications, significantly enhancing operational efficiency and user engagement.
- Played a pivotal role in a cross-functional team, delivering complex projects utilizing technologies such as WebSocket for real-time data communication and Node.js for backend development.

Jul 2022 - Aug 2022

Incoders Lab, New Delhi- Python Developer Intern

- Completed one month of intensive industrial training in Python Programming.
- Worked on real-world projects under the guidance of experienced developers.

Dec 2022 - Jan 2023

Coday , Online- Web Developer Intern

- Completed an internship focused on web development with Codacy.
- Engaged in full-stack development, employing HTML, CSS, JavaScript, and other pertinent technologies.

Training

July 2023 - July 2023

Data Analytics, ICT Academy, Tamil Nadu

- I successfully completed a 15-day intensive training in Data Analytics from ICT Academy.

Achievement

Apr 2022 Sona College of Technology, Salem Tamil Nadu

Won First Prize in 30 Hours of Non Stop Hackathon

- Won first prize in hackathon First Prize, 30-Hour Non-Stop Hackathon, Sona College, Salem, Tamil Nadu
- Developed and presented a deep learning and computer vision project.

[HackerRank 5-Star rating](#)

- Striving for a 5-star HackerRank Python rating. Diligent practice, concept mastery, and efficient code optimization lead the way. Seeking success through challenges and continuous learning

Project

HelpDesk Ticketing System- | [GitHub](#) |

- Spearheaded the development and implementation of real-time, scalable web applications, significantly enhancing operational efficiency and user engagement.
- Led the design and development of a comprehensive HelpDesk Ticketing System using Django, streamlining the issue resolution process for both customers and support staff.

E-Commerce Website Project- | [Demo](#) | [GitHub](#) |

- Developed a dynamic e-commerce website using Next.js, integrating MongoDB for data management and Firebase for user authentication and storage solutions.

YouTube Clone using ReactJs and Tailwind CSS- | [Demo](#) | [GitHub](#) |

- Engineered a fully functional YouTube clone to enhance skills in front-end development with ReactJS and responsive design using Tailwind CSS, alongside backend API integration via RapidAPI.

CarHub Website Project- | [Demo](#) | [GitHub](#) |

- Developed CarHub, an interactive web application using Next.js, designed to allow users to explore and filter various car models, leveraging the RapidAPI for data access.

[SmartStay: Guest Room Booking System with HTML, CSS, JavaScript, Bootstrap, Django, sqlite-3](#)

- Created an intuitive guest room booking platform, ensuring real-time availability, secure payments, and seamless user interactions for enhanced hospitality services.

Education

- B.Tech, Computer Science & Engineering Excel Engineering College 2020 - 2024
- Senior Secondary (XII, Science Anugrah Narayan College Patna (BSEB board) Year of completion: 2020
- Secondary (X G.D High School Deokund, Bihar (BSEB board) Year of completion: 2018
